Dear Colleagues,

It is our great pleasure to invite all of you to participate in the **9th National Symposium of Indonesia Antimicrobial Resistance Watch and Annual Scientific Meeting of Indonesian Society for Clinical Microbiology (9th NS-IARW and PIT PAMKI)**, which will be held on November 29th - 30th, 2014 at the Department of Microbiology FMUI and Intercontinental Mid Plaza Hotel, Jakarta, Indonesia.

The Theme of the 9th IARW symposium is **"Antimicrobial policies and practices for patient safety"**.

This symposium will be a great importance for all stakeholders who will do everlasting fight against infectious diseases. The symposium will be attended and presented by specialists dealing or associated with the control of antimicrobial resistance in hospitals and in community, both from Indonesia and from other countries. This will be a very effective medium for exchanging information and experiences between experts, resource persons, and practitioners, as well as increasing scientific capacity of the participants. We hope this symposium will produce recommendations on efforts to reduce the emergence and spread of antimicrobial-resistance strains.

This event is organized by **PAMKI (Perhimpunan Ahli Mikrobiologi Klinik Indonesia - Indonesian Society for Clinical Microbiology)** and collaborates with other professionals such as pharmacologists, infectious and tropical diseases experts, pulmonologists, intensive care experts, parasitologists, etc. We feel obligate to inform, recommend and set strategies that will support medical practitioners towards a better and responsible use of antimicrobial agents. We believe that you will not want to miss the opportunity of participating in this great event.

Looking forward to seeing you on November 29th - 30th, 2014 in Jakarta Indonesia

With best wishes,
